

CS 463 - Spring 2017 - Final Report

Project DevAI

Jacob Broderick, Kristen Patterson, Brandon Chatham

Abstract

This document details the progress made by the Starcraft AI Project. It includes a brief recap of the project, where the project currently is, and what stretch goals remain unfinished. It also talks about any problems that have occurred. This document was made with a video that details similar information, but demonstrates what the working project looks like.
